

1. A modular sign comprising: a base; a vertical support member releasably secured to the base; a lower horizontal member having first and second ends; first and second upreaching members connected to the first and second lower horizontal member ends; an upper horizontal member having first and second ends, the first end connecting with the first upreaching member and the second end connecting with the second upreaching member; a display member positioned between the first and second upreaching members and below the upper horizontal member; and movable connectors joining the display member to the upper horizontal member.

2. A modular sign comprising: a base; a support member secured to the base; a first horizontal member secured to the support member; at least one upreaching member connected to the first horizontal member; an upper horizontal member secured to the at least one upreaching member; a display member position proximate the at least one upreaching member and below the upper horizontal member; and at least one connector joining the display member to the upper horizontal member.

3. A modular sign as claimed in claim 1 wherein the movable connectors are ring connectors.

4. A modular sign as claimed in claim 2 wherein the at least one connector is a ring connector.

5. A modular sign as claimed in claim 1 wherein the display member has first and second sign faces.

6. A modular sign as claimed in claim 2 wherein the display member has first and second sign faces.

7. A modular sign as claimed in claim 3 wherein the display member has first and second sign faces.

8. A modular sign as claimed in claim 4 wherein the display member has first and second sign faces.
